ABOUT ME

I am a passionate Computer Science student with a strong ambition to become a skilled Software Developer. I am driven by curiosity and continuous learning in the technology domain. I have developed technical skills in programming, problem-solving, and software development through academic projects. I am seeking opportunities to contribute, learn, and grow in the software industry.

EDUCATION

Bachelor of Engineering (B.E) Computer Science and Engineering | CGPA: 7.24/10

Shree Venkateshwara HiTech Engineering College | Expected Graduation: May 2027

Relevant Coursework: Data Structures (Basics), Object-Oriented Programming (Java), Web Technologies (HTML, CSS)

TECHNICAL SKILLS

Programming Languages: Java, HTML5, CSS3, Python (Basics)

Development Tools: VS Code, Eclipse IDE, Figma (Basics)

Core Skills: Problem Solving, Prompt Engineering, UI/UX Design

PROJECTS

Zoomart – Online Grocery Shopping Web App | HTML, CSS, MySQL, SQL, Java (JDBC)

- Designed and developed an online grocery shopping web application using HTML and CSS with responsive product listing pages. Implemented user registration, login, product categories, and interactive hover details for items and pricing.
- Integrated MySQL database with SQL queries to manage users, products, and order data. Built a checkout flow with address form, multiple payment options, and order confirmation animation.

CERTIFICATIONS & ACHIEVEMENTS

- Participated in a competitive technical hackathon focused on collaborative innovation and practical solution building.
- Attended multiple workshops and symposiums on emerging technologies including AI/ML and Cloud Computing. Completed online courses in Prompt Engineering and modern web development practices.

ADDITIONAL EXPERIENCE

Academic Projects & Assignments

- Developed multiple web applications using HTML, CSS, and JavaScript as part of coursework.
- Implemented data structures and algorithms in Python and Java for various academic assignments.
- Collaborated with peers on group projects utilizing version control systems like Git and GitHub.
- Participated in code review sessions and technical presentations to improve communication skills.

SOFT SKILLS

• Problem Solving • Team Collaboration • Time Management • Adaptability • Communication • Critical Thinking
